

Georgetown University looks forward to your upcoming visit. To help protect the health and safety of the Georgetown community, including our guests, all visitors ages 12 and older to University-owned or operated buildings must be up to date on COVID-19 vaccination (i.e., primary series and, when eligible, an additional dose), or attest to having a medical or religious exemption from being vaccinated.

Please follow the steps below that are required before your visit.

- **Step #1:** Anytime between now and the day before your visit, please submit documentation showing you are up to date on COVID-19 vaccination by clicking on: <https://guccovid.force.com/visitor/s/?event=VE4840>
- - Acceptable documents: CDC COVID-19 Vaccine Card
 - WHO Vaccine Booklet
 - Documentation provided by a healthcare organization or country
 - *Note: If you are not up to date on COVID-19 vaccination but attest to having an appropriate medical or religious reason for not being vaccinated, you will be able to indicate this as part of Step #1 and proceed with the process required to visit our campus. You will be required to submit to the University proof of a negative PCR test taken within 48 hours prior to your arrival time on our campus when you submit your health attestation on the day of the event.*
- **Step #2:** Assuming successful completion of Step 1, you will receive a short health attestation form via email the morning of your visit to our campus. Please complete this form, attesting that you are symptom free at the beginning of the day you will be on campus. If you indicate any symptoms consistent with COVID-19, you will not be permitted to visit a Georgetown-owned or managed campus or building until you are symptom free.
